Vajazzling Instructions

1. Prepare the pubic area by first waxing or shaving. Waxing is recommended as it lasts longer.
2. Make sure the skin is clean and dry. Don't apply if client has any skin irritation from a recent wax or shave. If your skin is irritated, wait until it clears up. Regular skin safety procedures should always be adhered to.
3. Peel the clear film carefully from the white backing. The top of the Swarovski crystals should stick to the clear film. The bottom of the crystals, with the adhesive, should be exposed.
4. If any crystals stick to the white bottom, they can later be applied with tweezers.
5. Line up the pattern as desired.
6. Press firmly and hold for a few seconds. Holding for a few seconds helps the glue warm up and stick better.
7. The vajazzling pattern should last between 3-5 days. Wearing tight fitting clothes will rub the stones off. Loose fitting pants are recommended. Sexual activity can wear them all off during 1 session or multiple sessions depending on vigor.
8. The stones will gradually fall off one by one. They can be reapplied using skin safe adhesives.
9. Visit www.Vajazzling.com for refills.
